

Quality Assurance Engineer, reference number 364752

Pubblicata il 16/11/2020 scade il 10/12/2020

Eures Malta is looking for a Quality Assurance (QA) engineer to develop and execute exploratory tests to ensure the quality of company's three products. In this role, you would be testing new features or functionality, managing test environments, as well as report, document and communicate with the team and your wider stakeholders. The QA technician role plays an important part in our company's product development process. The ideal candidate will be responsible for conducting tests before product launches to ensure software runs smoothly and meets client needs, while being cost-effective. You will provide end-to-end solutions to software quality problems. Roughly, you can expect the following spread of tasks: 40% regression testing 30% new features/functional testing 10% managing testing environments 20% reporting, documenting and communicating with the team and wider stakeholder group
